ORAL CANCER FACTS

Oral Cancer is rising among women, young people, and non-smokers

25% of oral cancer patients have no known risk factors, including tobacco and/or excessive alcohol use

There is a link between oral cancer and HPV (human papillomavirus)

Weill Cornell Medical College

NewYork-Presbyterian Hospital/Weill Cornell Medical Center

Department of Otorhinolaryngology

1305 York Avenue, 5th Floor, New York, NY 10032
