

SelectHealth's *My Health Profile*

SelectHealth has a new Service for you!

It is called *My Health Profile* and it offers a new and easy way to monitor and maintain health information related to your SelectHealth patients.

What is *My Health Profile*?

My Health Profile provides a 'snapshot' of patients' core medical information via a secure website. The clinical 'snapshot' is based on an emerging standard for electronic health information exchange, termed the *Continuity of Care Document (CCD)*.

My Health Profile offers a more complete clinical picture to members and their care providers who often work without access to central or critical medical records. Some of the core clinical and demographic information that you can expect to see includes:

- Care Team Members and Contact Information
- Filled Medications
- Selected Laboratory Results

What are the Benefits of *My Health Profile*?

My Health Profile is a "virtual" portable health profile.

My Health Profile will allow you to access core patient health information in a simple, concise format, 24-hours a day.

My Health Profile may reduce time lost in trying to reconstruct a health profile every time your patient has an appointment or referral.

My Health Profile will allow providers, with member approval, to access critical health information that may be needed **during an emergency**, or when traveling, for faster and better healthcare attention.

My Health Profile will help improve peer to peer communication, streamline workflow, and improve patient satisfaction with overall care coordination.

We're confident that you're going to love using *My Health Profile* !

**Members can carry an optional emergency card.
Please encourage your patient to do so!**

**For more information, please contact Member Services at:
(866) 469-7774**

Here is what a profile may look like:
