

Compendium of Clinical Guidelines Relevant to the Care of People Living With HIV/AIDS (PLWHA) and their Dependent Children:

The following guidelines can be accessed by following the links or by visiting SelectHealth's website at www.nyp.org/selecthealth. Guidelines by relevant federal, state, city, or professional societies are reviewed quarterly by SelectHealth's Medical Management Department for updates or changes thought likely to have an impact on clinical care. Guidelines that have been updated within the previous calendar year will be noted to alert readers that new information within a particular topic exists.

[Treating opportunistic infections among HIV-infected adults and adolescents. Recommendations from CDC, the National Institutes of Health, and the HIV Medicine Association/Infectious Diseases Society of America.](#) Centers for Disease Control and Prevention - Federal Government Agency [U.S.]. 2004 Dec 17.

NYC DOHMH Division of Health Care Access and Improvement resources can be accessed at: <http://www.nyc.gov/html/doh/html/hca/hca.shtml>

One of the most important efforts by NYC DOHMH in recent years is the Take Care New York (TCNY) initiative. Health care providers are important partners for the Take Care New York program. They can play a vital role by promoting prevention and early detection at every clinical encounter. The material found on the following website provide guidelines for key preventive services related to the 10 areas of Take Care New York. Additional resources and information are available by clicking on the embedded links. Please take a moment to review this worthwhile effort and consider becoming a TCNY partner.
